SUMMARY:

A detail-oriented and goal-driven Front-End Engineer & Mobile App Developer with hands-on experience in building efficient components, scalable architectures, and responsive websites. Skilled in developing pixel-perfect designs and creating seamless, user-friendly web and mobile applications across cryptocurrency, fintech, and health-tech sectors. Proficient in HTML, CSS, JavaScript, jQuery, Typescript, React, NextJS, React Native, Flutter, Docker, GSAP, TailwindCSS and Shadcn alongside modern libraries and frameworks.

Passionate about delivering high-quality, well-documented code and optimizing user experiences. Also, a professional Forex and Crypto analyst, committed to driving innovative tech solutions and delivering top-tier digital services for operational excellence.

CORE COMPETENCIES:

- **Technologies:** | JavaScript | jQuery | React Native | Django | Next JS| SQL | Tailwind | CSS | Sass | GSAP | Flask | HTML | CSS3 | RESTful APIs | Bootstrap | JavaScript | Webpack | Redux | Flutter | Docker |
- **Collaboration Tools:** | Jira | Slack | Teams | Git | MS Office | Google Workspace |
- **Agile Methodologies:** | Scrum | Kanban |
- **Community Management:** Telegram | WhatsApp | Discord |
- **Core Skills:** Web design, UI/UX design, cross-browser compatibility, performance optimization, debugging, version control, Code Review, Technical Documentation, API Integration, Troubleshooting,
- **Soft Skills:** Mentorship, problem solving, leadership and good communication skills

WORK EXPERIENCE:

LEAD FRONT-END DEVELOPER

Jan 2024 – Present

Candour IT Service - IT solutions company providing innovative tech solutions to businesses worldwide.

- Lead a team of 4 frontend developers to build a scalable accounting software using micro frontend architecture and integrated over 300 API endpoints.
- Design, develop, and maintain over 7 responsive web applications using modern frameworks like React.js and Angular
- Write clean, efficient and maintainable code and identified performance bottlenecks and bugs.
- Optimize applications for enhanced speed, scalability and overall performance
- Onboarded and mentored 3 interns, who successfully advanced to junior developer roles.
- Provide technical leadership, mentoring, and code reviews for junior engineers.
- Create and maintain comprehensive technical documentation for front-end projects.
- Document design decisions and ensure knowledge transfer within the team.
- Contributed to decision making process by collaborating with product managers, designers, backend engineers and stakeholders to drive product innovation and business growth.

Skills: | React.js | Next.js | Micro Frontend Architecture | API Integration | Performance Optimization | Code Review | Technical Documentation |

FRONT-END DEVELOPER

March 2023 – May 2023

VastFluid Finance - A next-generation decentralized exchange (DEX) built on the Arbitrum network.

- Collaborated with the design team to create an intuitive and user-friendly front end for a Dapp.
- Developed a fully responsive landing page for VastFluid's website.
- Enhanced mobile compatibility and reduced bounce rates for the website.
- Worked with development teams and product managers to ideate and implement software solutions, that accelerated project delivery timelines.
- Developed scalable front-end website architecture that resulted in seamless navigation and a boost in page load speed.
- Troubleshoot, debugged, and upgraded software to reduce system errors and enhance overall application stability.

Skills: Frontend | UI/UX Design | Web Architecture | Software Debugging | Performance Optimization | Responsive Web Design

FRONT-END DEVELOPER (Freelance)

Jan 2023 – Feb 2023

DEFT Trader - A forex brand that helps traders, and investors become profitable in the forex market.

- Designed & developed a fully responsive multi-page Forex website, providing a seamless user experience across multiple devices & screen sizes.
- Implemented functional authentication, an admin panel, and a database using Firebase, ensuring secure access and efficient data management.
- Integrated REST APIs to fetch real-time data from Myfxbook, improving website functionality and providing users with up-to-date financial insights.
- Ensured cross-browser compatibility and accessibility compliance for a broader user reach.
- Managed version control using Git, ensuring seamless collaboration and deployment.
- Developed interactive UI components using modern JavaScript frameworks to enhance user engagement.
- Maintained and updated the website by implementing new features and fixing bugs for continuous improvement.

Skills: | Firebase | REST API | UI/UX Design | Responsive Web Design | Authentication & Authorization | Database Management | Web Performance Optimization |

STRATEGY AND QUALITY ASSURANCE MANAGER

Oct 2021 – Dec 2022

StableDoc - A Blockchain- and AI-powered telehealth platform providing global cross-boundary healthcare.

- Evaluated 20,000+ lines of code to ensure industry best practices are followed, boosted product optimization by 20% and made the codebase 100% developer-friendly.
- Led a team of 2 designers and 6 developers to successfully launch a DApp, 3 mobile, and 2 web applications.
- Submitted detailed code evaluation reports, enabling data-driven decisions that boosted productivity.
- Recommended high-quality designs that contributed to building 5 products with 90% efficiency.
- Managed an ecosystem community platform alongside 8 other community managers, fostering engagement and collaboration.
- Built cutting-edge tools and applications to align with strategic business and project objectives.
- Optimized website and application performance to improve load speeds and user experience.
- Provided mentorship and technical guidance to junior developers, encouraging team efficiency and code quality.

Skills: | Flutter | Solidity | Code Review | Performance Optimization | Team Leadership | Community Management | Product Development |

EDUCATION:

Senior Secondary Certificate Examination
Anglican Grammar School, Ogun State, Nigeria.

2011
